48:02:08:01. Hardware specifications. Each video lottery machine licensed for placement in the state must meet the following hardware specifications:

(1) Electrical and mechanical parts and design principles may not subject a player to physical hazards;

(2) A surge protector must be installed on the line that feeds power to the machine. The battery backup or an equivalent for the electronic meters must be capable of maintaining accuracy of all information required in SDCL 42-7A-37(5) and (6) for ~~180~~one hundred eighty days after power is discontinued from the machine. The backup device shall be kept within the locked logic board compartment;

(3) An on/off switch that controls the electrical current used in the operation of the machine and any associated equipment must be located in an accessible place within the interior of the machine;

(4) The operation of each machine may not be adversely affected by static discharge or other electromagnetic interference;

(5) An electronic or mechanical coin acceptor may be installed on any video lottery machine approved after July 1, 2003. Each video lottery machine approved after July 1, 2003, may contain a bill acceptor that accepts one-dollar bills, five-dollar bills, ten-dollar bills, twenty-dollar bills, fifty-dollar bills, ~~and one hundred-dollar bills,~~ and ticket vouchers. The bill acceptors may be for any single bill or combination of bills in the denominations listed in this subdivision and ticket vouchers. Approval letters and test reports of the coin and bill acceptors from other state or federal jurisdictions may be submitted. However, all coin and bill acceptors are subject to approval by the lottery;

(6) The internal space of a video lottery machine may not be readily accessible when the front door is both closed and sealed;

(7) Logic boards and software Eproms (computer chips that store memory) must be in a separate, locked area within the machine;

(8) The cash compartment must be contained in a locked area within or attached to the machine;

(9) No hardware switches may be installed that alter the pay tables or payout percentages in the operation of a game. Hardware switches may be installed to control graphic routines, speed of play, and sound;

(10) A single printing mechanism must be capable of printing an original ticket voucher and retaining a legible copy within the machine or create an electronic copy on a self-contained internal or external medium prior to the continuation of game play. The ticket voucher must record the following information when credits accrued on the video lottery machine are redeemed for cash:

(a) The number of credits;

(b) ~~Value~~ The value of the credits in dollars and cents displayed in both numeric and written form; and

(c) Any other information required by SDCL 42-7A-37(5);

(11) An unremovable identification plate must appear on the exterior of the machine that contains the following information:

(a) Manufacturer;

(b) Serial number; and

(c) Model number;

(12) The rules of play for each game must be displayed on the machine face or screen. The lottery may reject the rules if they are incomplete, confusing, or misleading. Each game must also display the credits wagered and the credits awarded for the occurrence of each possible winning hand based on the number of credits wagered. A video lottery machine may not allow more than \$2two dollars to be played on a game or award free games or credits in excess of one thousand dollars per bet.

All information required by this subdivision must be kept under glass or another transparent substance and at no time may stickers or other removable devices be placed on the machine face;

(13) Equipment must be installed that enables the machine to communicate with the lottery's central computer system, as required in SDCL 42-7A-37(7), using a communications protocol provided to each licensed manufacturer by the lottery for the information and control programs approved by the commission; and

~~(14) Instant tickets may be dispensed from a machine, provided the machine is submitted and approved by the lottery pursuant to § 48:02:08:02; and~~

~~(15)~~(14) The legal age requirement in SDCL 42-7A-48 for a person to play a machine must be displayed on the machine face under glass or on an unremovable plate on the front exterior of the machine.

48:02:08:05. Software requirements for play transaction records. Each game must maintain electronic accounting meters at all times, regardless of whether the machine is being supplied with power. Each meter must be capable of maintaining totals no less than eight digits in length for the information required in subdivisions 1 to 4, inclusive, below. The electronic meters must record the following information:

(1) Total number of coins inserted. The meter must count the total number of coins, bills, and ticket vouchers that are inserted by the player or the coin equivalent if a bill acceptor is being used;

(2) Number of credits wagered;

(3) Number of credits won;

(4) Credits paid out by a printed ticket voucher;

(5) Number of times the logic area was accessed;

(6) Number of times the cash door was accessed;

(7) Number of coins or credits wagered in the current game;

(8) Number of coins or credits won in the last complete, valid game, commonly referred to as the win meter; and

(9) Number of cumulative credits representing money inserted by a player and credits for games won but not collected, commonly referred to as the credit meter.

No game may have a mechanism by which an error will cause the electronic accounting meters to automatically clear. Clearing of the electronic accounting meters may only be completed after notification and approval by the lottery. Upon notification to the lottery, all meter readings must be recorded both before and after the electronic accounting meter is cleared by a manufacturer

or by a Type II technician replacing the main logic board with a board that has been previously cleared by a manufacturer.

- 48:02:10:06 Machines to be maintained in operating condition.
- 48:02:10:07 Maintenance log forms required.
- 48:02:10:08 Operators required to furnish keys to machines for inspection purposes.
- 48:02:10:09 Notification of repairs to the logic area.
- 48:02:10:10 Notification of broken seals on logic board.

48:02:10:03. Availability of training. Manufacturers and distributors shall notify operators who have either purchased or expressed interest in purchasing their machines at least three weeks in advance of scheduled training programs. Training programs to qualify ~~for the~~ as a Type I technician must be scheduled at locations and times within the state to accommodate persons needing training. This rule does not mandate the scheduling of training programs at the location of each business licensed as an operator. Training may be conducted at the manufacturer's and distributor's principal place of business or at other locations to accommodate persons applying to

qualify ~~for~~ as a Type I technician. Training programs to qualify ~~for the~~ as a Type II technician are held ~~at the lottery office in Pierre~~ within the state of South Dakota with lottery personnel assisting the manufacturer or distributor in the training. Training ~~programs~~ for Type II technicians shall be scheduled to accommodate persons needing qualification. Manufacturers and distributors must provide subsequent training ~~programs~~ and inform operators and the lottery of new developments in the service and repair of its machines.

48:02:10:05. Operators required to have training in service and repair of video lottery machines. Each business licensed as an operator and its service agents must demonstrate that they have experience in the service and repair of video lottery machines and must attend and successfully complete the training provided by the manufacturer and distributor for each machine model it purchases for placement in the state. Operators must be qualified or have an employee or service agent of the business qualified as a Type I technician to provide basic service and repair of its machines. All operators must be qualified or have an employee or service agent qualified as a Type II technician to provide service and repair of its machines. Any maintenance work that falls within the parameters of the training required of a Type II technician, as described in § 48:02:10:02.02(1), are required to be completed by a Type II technician certified to work on that manufacturer's machines. Persons qualified as a Type II technician do not need to be separately qualified as a Type I technician. Operators must file with the lottery the following information within two weeks after the operator, its employees, and its service agents qualify as a Type I or II technician:

- (1) The names of the operator, employees, and service agents who qualified and their type of classification;
- (2) The name of the manufacturer and distributor offering the course;
- (3) The manufacturer's machine models on which training for service and repair was provided; and
- (4) The date and location of the training program.
